The flameless revolution

Made of real wax, our candles look, feel and flicker just like traditional candles but will never burn or start a fire. We are the market leader in flameless candle technology, all of our candles have been programmed with infrared technology so that one remote control can operate an entire collection.

Australian
owned and
designed

Our new and improved battery engines have been designed to give greater time between battery changes. The battery life of our standard range is up to 400 hours in the smaller sizes and 1000 hours in the large. We have gone one step further by introducing automatic timers throughout our range with a choice of two settings that can be activated manually at the base of the candle or with the convenience of a remote control.

Why Choose RSC?

Not all flameless candles are the same... here are some tips to ensure you choose a genuine RSC.

- 1 - The oversized LED bulb is strategically positioned at the base of the candle ensuring the most authentic look. After all who wants to see the light bulb especially at table top level.
- 2 - The state of the art LED bulb mimics the behaviour of a traditional candle. The flicker is soft and relaxing unlike the strobe effect you see with so many other brands.
- 3 - Our sleek remote controls offer a choice of unique lighting options that include multiple timers and the ability to adjust the brightness of the candle.
- 4 - Unlike some brands that only offer a 90 day warranty, RSC stand behind the quality of their products and offer a 12 month warranty.
- 5 - All of the candles come packaged in a stylish gift box that even the most discerning would love to give or receive.

The designer collection

The Designer Collection is a luxurious range that is suitable for public, private, informal and formal settings. This unique range makes an immediate statement in any space yet complements its surroundings whether indoors or outdoors.
